

Positive Energy Plates

Everything in the Universe is energy and vibration. Each basic element of the known atomic chart consists of energy at different rates of vibration. The difference between gold and silver is due to the difference in atomic structure and vibration rates.

There is a frequency or vibration of energy that saturates the Universe. This energy is beneficial to all living cells whether human, plant or animal. Man has the power to utilize this energy "with his mind." Every thought is transmitted by this energy . . . this basic energy of the Universe. This energy might be considered the basic power of the Universe . . . or God. God is everything, everywhere. The power behind the thought is "energy" . . . or call it God Power or Creative Power . . . or Prana in Yoga philosophy. The Breath of Life, the Holy Spirit is this energy.

Spiritual growth is our only purpose and reason for being alive on earth. Each individual must learn how to utilize this energy for spiritual growth and constructive purposes. Constructive use of (positive use) of this energy raises the level of consciousness of man . . . or raises his vibration rate or frequency. Every individual has a different rate of vibration. All of man's earthly problems are created by his thought projections. What we project from our mind in the form of thoughts, we create and receive. Spiritual growth requires "overcoming all negative thinking" . . . which dissipates "the life force" or vital energy.

The energized plates are to help mankind raise his vibrational rate. The atomic structure of these plates has been altered with man-made equipment. The atoms and electrons are in resonance, or in tune, with the basic energy of the Universe. They function, as transceivers . . . creating a field of energy around themselves that will penetrate any material substance. This energy is very beneficial (the life-force energy) to all life . . . plant animal or human. It might be considered as Positive Energy, or as God Power. Love is "positive energy". God is love. God is energy.

Science has proven that by projecting "love", or positive energy to a plant, the plant will flourish and grow vigorously. If a child is injured, its mother will project love (positive energy) to the child . . . by laying her hands on the painful area. She automatically releases "energy", or Prana in Yoga, and the pain is relieved. The plates can do the same thing when placed upon an injured area of man, plant or animal. If a person receives a burn, they have suddenly changed the normal vibrational rate of the tissue . . . and they suffer pain. The plates will help to quickly return the burned area back to its normal rate of vibration . . . and the pain will usually be relieved or disappear. All faith healing utilizes this energy.

These plates will help raise the vibrational rate of any individual using them. In no way can these plates be harmful! The plates can neutralize anything negative in food or water. Travelers in foreign countries energize their drinking water and eliminate illness and stomach upset from water changes.

When the plates are placed upon burns, cuts, aches and pains in the human body, healing appears to be accelerated and the pain lessens or disappears entirely. This is accomplished by returning the injured cells or tissue back to its normal vibrational rate. Healing is accomplished by bringing the afflicted area back into proper balance.

These plates have been channeled to Earth from the higher realms (spiritual world) to benefit mankind and to help relieve his suffering at this time (the twilight hours before the dawn of a New Age). The violet color represents the 7th Ray (and the violet flame of St. Germain). The color (vibration) is very beneficial to obtain the desired results.

Some people sleep on these plates by placing them under their mattress . . . and this helps to give them more energy and raise their vibrational rate. Other people cannot sleep with the plates near them, as they will remain awake most of the night. By wearing the small plate in a pocket, most people will feel an increase of energy and less fatigue.

Plates that have been in use for more than 15 years . . . are still functioning very well after that length of time. Once the structure of the atoms of the aluminum has been altered, they will remain in that condition . . . possibly indefinitely. Plates are not "charged". They are utilizing the basic energy of the Universe, or free energy.
