

Energy Innovation Products

By RALPH BERGSTRESSER

THE UTILIZATION OF "free energy" has been applied to the design and development of a series of practical products for home and commercial use.

Our universe is alive with "energy". It may be considered the "life force" frequency or vibration that saturates the entire universe. This energy keeps us alive. When this life force leaves our body ... we are dead. This is true of all living things. If an apple is cut from a tree, its life force has been cut off. The apple begins to deteriorate

Ralph Bergstresser weighs an 11½ lb. chicken that was raised from a chick and fed energized water and food. The "life force energy" improves the quality and health of any species ... human, animal, fish, or plant. The eggs produced by these chickens had a very substantial quality (not water-like) and a deep yellow-orange yoke. They were delicious and far superior to the eggs we know today. These chickens grew up on the ground (not in cages) which could have made a difference.

— Northridge, California — 1978

and the same is true of all plants, vegetables, fruit and dairy products.

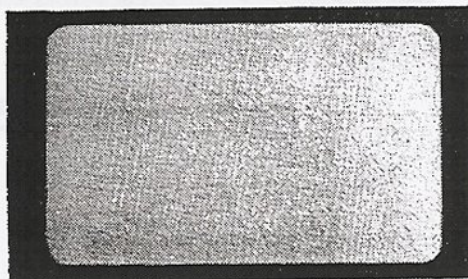

One of our best products was designed to prolong the useful life of food in home refrigerators. By placing our energy cube in a home refrigerator, the food lasts two to four times longer than normal as the food is back in a field of "life force energy" ... the same energy vibration when it was growing in the ground or on a tree. The Canadian

government ran tests eight years ago on this device. They found that by placing this "Fridge Freshner" in a home refrigerator, a saving of \$4.00 per month on electrical consumption resulted from its use. This was an added feature that was never anticipated. Most thermostats must be raised on home refrigerators, otherwise the food will freeze ... and of course, this saves energy. These devices also deodorize.

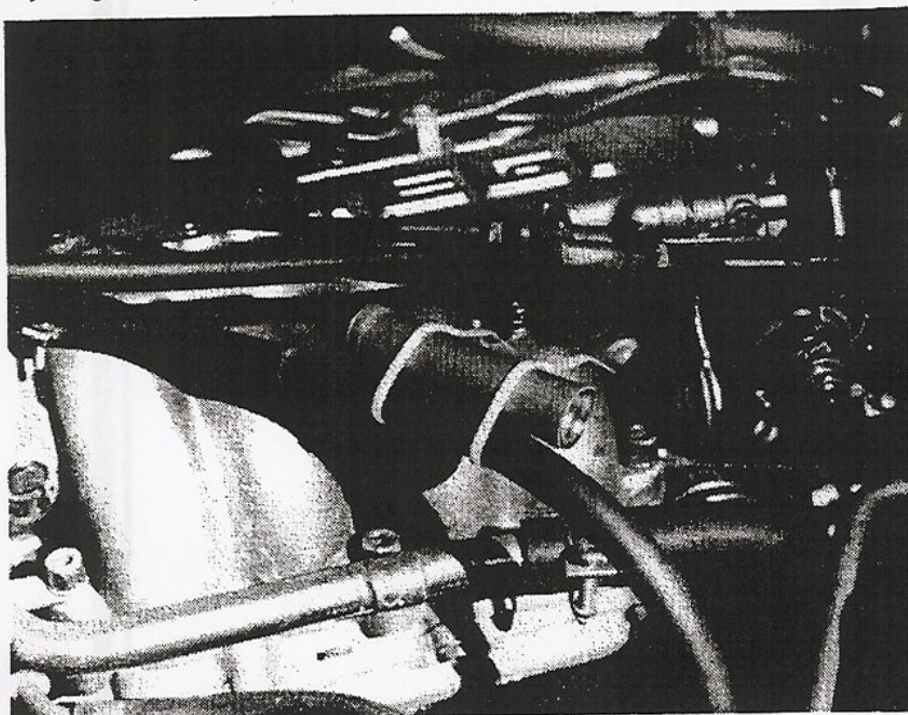

How do these units work. The atomic structure of the decomposed granite that is used in most of our products has been altered. This process (proprietary) brings these products into resonance or harmony with the basic energy (free energy) of the universe. These devices are like transceivers (receivers and transmitters). They create a field of life force energy around themselves

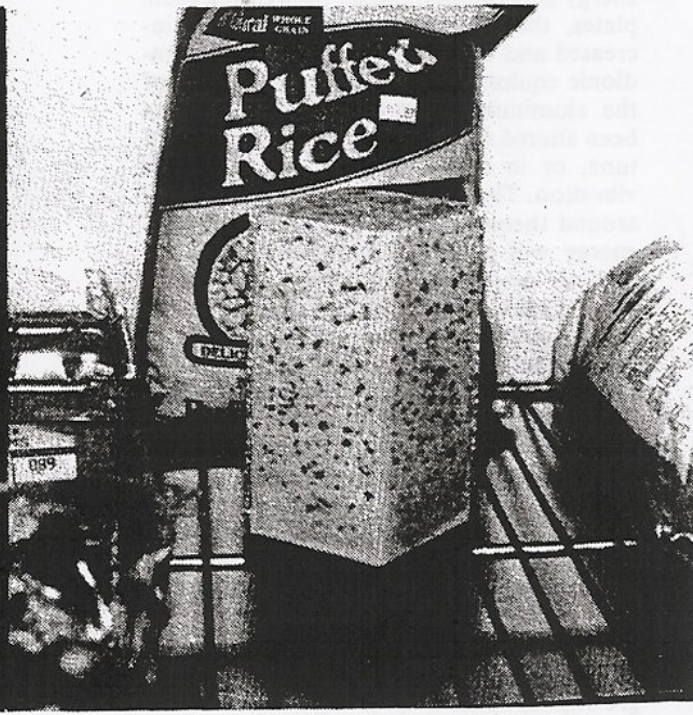

Green Thumb energy tubes for improving quality and growth of plants and vegetables.

Purple energy plates may be worn in a pocket or women usually keep them in their purse.

Fuel ionizer shown installed on a fuel line which gives greater mileage, quicker starting and improves overall performance on the automobile.

Energy cube (Fridge Freshner) for home refrigerators.

that will penetrate any material substance ... by osmosis. The size of the mass of the altered material will vary with each product and application. The refrigeration unit weighs approximately one pound. The swimming pool unit weighs approx. 40 pounds ... and will easily ionize a 50,000 gallon swimming pool.

The ionization process for swimming pools cuts the chemical requirements by fifty percent and eliminates the adverse effects of chemicals on the eyes, skin, hair and sinus. They also have a cleaning action on the pool surface. The pool water becomes crystal clear in a few days and they are guaranteed for five years.

Our hot water tank ionizers are shaped like a large fish. They weigh about six pounds and are placed on top of the hot water tank (either gas or electric). Within two or three days, the water becomes soft although the mineral content has not changed. The water feels soft, reduces soap requirements for washing clothing and dishes and showers. This ionized water makes delicious coffee and is used for drinking. This device produces soft water only from the hot water faucet. A gallon jug of water may be kept in the refrigerator for drinking purposes.

Our fuel ionizers are installed on the fuel lines of vehicles (diesel or internal combustion engines). This device causes the fuel to vaporize more completely and this in turn, improves mileage, reduces emissions, causes quicker starting and improves performance of vehicle. The installation requires about two or three minutes. These units last for many years and soon pay for themselves.

The most important "energy" in our life ... is our own vital energy. Our purple energy plates may be worn in a pocket. Women without pockets usually keep the energy plate in their purse. By wearing these plates, the life force energy is greatly increased and this may be proven on any radionic equipment. The atomic structure of the aluminum violet anodized plates has been altered so that they are in harmony, in tune, or in resonance with the life force vibration. The plates create a field of energy around themselves and by "osmosis", this energy will penetrate any living thing including an individual, plant or animal. With radionic equipment, the life force energy may be measured on an individual. For example, on a scale of say from 0 to 100, the energy reading of a person might be twenty to twenty-five. When the person is handed an energy plate, the reading will instantly increase up to ninety or ninety-five on the scale. This is an indirect method of proving the product. The frequency of this "life force energy" can not be measured directly by any known device.

Our "Green Thumb" energy tubes are being used by tens and thousands of people all over the world to improve quality and growth of plants and vegetables. These tubes are dropped into a gallon jug of water and left to sit over night (or 8 to 12 hours).

The water becomes energized and is then poured on plants and vegetables. The results are fantastic. Each tube will last for many years and can make thousands of gallons of energized water for use on plants in homes and gardens. This product is truly a "green thumb" and particularly good for those who have problems in making plants grow.

Many years of research and study were required to bring about these products. A curious mind is required for scientific progress outside of the conventional realms. This all started in India over forty years ago when I was guest of a maharajah. He had an eight month old son that was very sick. I asked if he was going to get a doctor. He said "no", we have sent a man to obtain some holy water from the Ganges River. In three days, the man came with one gallon of water. They fed the water to the sick child ... and like magic, the child was healed and back to normal. To me, a miracle is the inability to understand a scientific fact. How could the water cure the child? That was the problem. It was this incident that triggered my curious mind to find the answer and this led me into the present knowledge. My conclusions after many years of research. God is Energy. God is Love, Postive Energy is Love. The "Life Force Energy" is God.

For further information on these "new age" products, write or call Ralph Bergstresser, Energy Innovation Products, P.O. Box 5011, Scottsdale, Arizona 85261 ... or call area 602 / 996-6746.

KUP'S KOMMENT:

Readers will remember Ralph and his products from the last issue of HC/JAQA, April 1986. Here is another Suberbeing serving humanity!!! I thank Chief Two Trees for introducing me to him, and I am proud to be able to bring you information about these products. My gas mileage has increased from 28.5 to 32.0 mpg with the Fuel Ionizer and I have had to increase the temperature setting in the frig for it became too cold! Food lasts a lot longer!

The Villa Roma Motel in Las Vegas wrote "We have been using the Rainbow Pool Energizer on our hot water tank that supplies water to our own laundry and have found it to be a great asset in conditioning the water by ionization. For this reason we are now using 40 to 60% less detergent for washing our linens daily."

Thanks, Ralph for you sharing this information and God bless you in your continuing service.
